Solderstation

— REFLOW OVEN

Touch. Connect. Solder.

WHY SOLDERSTATION

Four reasons it's yours.

Everything that matters — and nothing that doesn't.

01

Hardware.

Built for SMT.

Dual ceramic heaters, top and bottom, independently controlled. Purpose-built — not a toaster oven with a relay.

02

Chemistry.

Runs any solder paste.

Lead-free, leaded, low-temp bismuth — if your paste has a profile, Solderstation runs it. **Any paste, any profile.**

03

Control.

Set temp by yourself.

Dial in your own soak and reflow **temperatures and times**. Save it. Run it again tomorrow.

04

Future.

Upgradable software.

Firmware updates arrive over Wi-Fi. New features, better profiles — **no USB needed.**

SMART CONTROL

Touch the oven, or open it on your phone.

Crisp capacitive display on the unit. A zero-install web app on every device on your Wi-Fi.

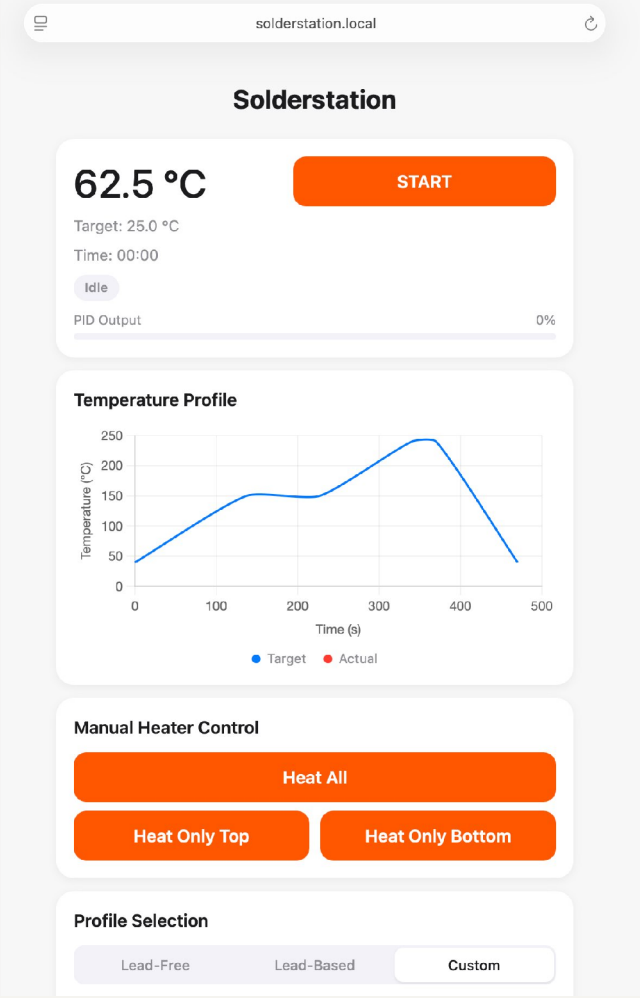

https:// solderstation.local

01 Connect to Wi-Fi.

02 Open `solderstation.local`

03 Done.

- LIVE TEMPERATURE
- PROFILE GRAPH
- PID OUTPUT
- MANUAL HEATER CONTROL
- PROFILE SELECTION

— THE FACTS

Specifications.

Nothing rounded up. Nothing hidden in a footnote.

UNIT

POWER	1.2 kW
MAX TEMPERATURE	250°C
MAX PCB SIZE	180 × 260 mm
HEATING	Dual ceramic (top + bottom)
CONTROL	PID · Touch display · Wi-Fi
PROFILES	Lead-Free · Lead-Based · Custom

SOLDER PROFILES

PROFILE	SOAK	REFLOW
■ Lead-Free	150 °C / 90 s	240 °C / 30 s
■ Lead-Based	130 °C / 90 s	210 °C / 30 s
■ Custom	Your paste, your values.	

— SHOWN TO SCALE

Actually fits up to 180 × 260 mm.

REAL CLEARANCE. REAL BOARD. DOOR OPEN, RACK IN.

— READY WHEN YOU ARE

Ready to reflow without the guesswork?
